Bio Memory -86°C Freezer

Original design: The Bio Memory range was Froilabo's first ULT freezer range and has become a symbol of exemplary performance and reliability.

Maximum sample protection: BoSS (Board Substitution) system that powers compressors in the event of electronic fault.

Product Description

2 volumes for all your needs

This range is available in 2 volumes, 175L and 1000L, for a maximum capacity of 72,000 tubes.

An under bench model based on the BM175 is also available, with a height of 819mm.

A interface refined

The BM range, which is known for making Froilabo famous, offers unique construction and performance for exemplary reliability.

A intuitive interface

The BMT range offers, in addition to the regulator equipping the BM range as standard, a touch screen integrated into the door for a more intuitive interface. The functions and performance are identical to the BM range.

A freezer created for your laboratory

- Handle with progressive tightening,
- Temperature display at eye level on BMT,
- Inner tank stainless steel.

Protection and security of your samples

The BM and BMT ranges are equipped as standard with the BoSS (Board substitution) system that allows you to directly power the compressors in the event of an electronic fault, thus avoiding the need for an emergency freezer for an electronic failure.

Control is entrusted to an industrial controller for exemplary reliability and durability.

Wide range of interior equipment

- Full range of side access racks,
- Complete range of drawer storage units,
- Drawers suitable for storing microplates,
- Baskets suitable for bulk storage,
- Possibility of realization of custom storage elements.

A Service Team dedicated to the protection of your samples

The Froilabo After-Sales Service is made up of a team of technicians specializing in -86 ° C freezers to maintain your freezers and guarantee the protection of your samples.

Refrigerants compliant with the new F-Gas regulations

As global warming and ecology in general are at the heart of our concerns, the refrigerants used in all Froilabo freezers comply with the new F-Gas

regulations (EU No. 517/2014).
